INTRODUCTION

This policy explains Colchester County High School for Girls expectations of staff, students and other users (working for or on behalf of CCHSG), in respect to the use of the Internet, e-mail, messaging systems and related technologies, including Buy Your Own Device (BYOD) laptops.

This policy applies to all Internet, e-mail, messaging systems and all related technology services provided by Colchester County High School for Girls, and to all Colchester County High School for Girls users accessing these services. This guidance does not attempt to cover every possible situation but expresses the philosophy and general procedures users should apply when using any forms of ICT and electronic communication services at Colchester County High School for Girls.

The Internet, e-mail, messaging systems and related technologies can be extremely valuable tools in an educational context, encouraging the development of communication skills, and transforming the learning process by opening up possibilities that, conventionally, would be impossible to achieve. Colchester County High School for Girls encourage the use of electronic mail as a medium for paper mail replacement and as a means of enhancing communications.

Creating a safe ICT learning environment includes three main elements at Colchester County High School for Girls:

- An effective range of technological tools used to enhance teaching and learning, communication and business systems;
- Policies and procedures, with clear roles and responsibilities;
- Access to e-Safety information for students, staff, parents and carers and other users;

44c Social Media Policy

Please Note: This e-Safety Policy has been written by Colchester County High School for Girls e-Safety Coordinator, building on the Essex County Council Model Policy, the London Grid for Learning (LGfL) model policy and the South West Grid for Learning SWFfL model policy. It has been agreed by Colchester County High School for Girls Local Governing Body, Senior Leadership Team, IT Manager and the e-Safety Coordinator.

CONTEXT

*Harnessing Technology: Transforming learning and children's services*¹ sets out the government plans for taking a strategic approach to the future development of ICT.

"The Internet and related technologies are powerful tools, which open up new prospects for communication and collaboration. Education is embracing these new technologies as they bring with them fresh opportunities for both teachers and learners.

To use these technologies effectively requires an awareness of the benefits and risks, the development of new skills, and an understanding of their appropriate and effective use both in and outside of the classroom."

Statutory guidance including the provisions of the *Children Act 2004*², and *Keeping Children Safe in Education*³ sets out how organisations and individuals should work together to safeguard and promote the welfare of children.

The 'staying safe' outcome includes aims that children and young people are:

- safe from maltreatment, neglect, violence and sexual exploitation;
- safe from accidental injury and death;
- safe from bullying and discrimination;
- safe from crime and anti-social behaviour in and out of Academy;
- secure, stable and cared for;

Much of these aims apply equally to the 'virtual world' that students will encounter whenever they use ICT in its various forms. For example, we know that the Internet has been used for grooming young people with the ultimate aim of exploiting them sexually; we know that ICT can offer new weapons for bullies, who may torment their victims via websites or social media messages; and we know that students have been exposed to inappropriate content when online, which can sometimes lead to their involvement in crime and anti-social behaviour.

It is the duty of Colchester County High School for Girls to ensure that every student in their care is safe, and the same principles should apply to the 'virtual' or digital world as are applied to Colchester County High School for Girls physical buildings.

This Policy document is necessary to protect all parties and aims to provide clear

¹ www.dfes.gov.uk/publications/e-strategy

² www.education.gov.uk/publications

³ Keeping Children Safe in Education, DfE, 2019

advice and guidance on how to minimise risks and how to deal with any infringements.

1. ROLES & RESPONSIBILITIES

This section is intended to outline who takes responsibility for each particular element of e-Safety, the acceptable use of the Internet, e-mail, messaging systems and related technologies in the school.

Governors

The school's governing body are responsible for the approval of the policies contained within this document and for reviewing their appropriateness. A member of the governing body has the role of e-Safety Governor.

This role includes:

- Annual or more regular meetings with the e-Safety Coordinator to complete the Governors e-Safety Checklist (see Appendix 8)
- Monitoring of the schools e-Safety Incident Logs (SIMS)
- Monitoring of the filtering and permissions procedures
- Reporting to the governing body

Senior Leadership Team

- In-line with the schools safeguarding policy the Executive Principal assumes overall responsibility for the safety including e-Safety of all members of the school community, though the day-to-day enforcement of e-Safety, appropriate use of the schools ICT systems and appropriate internet conduct will be delegated to the e-Safety coordinator.
- The Senior Leadership Team are responsible for ensuring that the relevant personnel outlined in this section are given adequate support and relevant CPD to allow them to carry out their role effectively and where necessary train others.
- The Senior Leadership Team are responsible for ensuring that appropriate training is provided to allow staff to understand the need for and the ability to follow the procedures outlined in these policies.
- The Principal* and Senior Leadership Team must be made aware of the protocol following a serious incident concerning e-Safety, misuse of ICT or inappropriate internet conduct.
- In the event of a serious incident the Executive Principal must be fully informed and given the opportunity to decide how the incident be managed.

*Please note:

The term "Principal" is used at CCHSG to identify the person with responsibilities of headship, who may be referred to locally as Executive Headteacher or Associate Principal

e-Safety Coordinator

The e-Safety coordinator is responsible for:

- reporting incidents concerning e-Safety, misuse of ICT or inappropriate internet conduct to the relevant personnel
- taking day to day responsibility for e-Safety, misuse of ICT or inappropriate internet conduct issues and has a leading role in establishing and reviewing the school policy document
- ensuring that all staff are aware of the procedures that need to be followed in the event of an e-Safety, misuse of ICT or inappropriate internet conduct incident taking place.
- providing adequate training and advice for staff that will allow them to understand the need for and the ability to follow the procedures outlined in these policies.
- providing appropriate information and training for parents/carers in regard to e-Safety, appropriate use of ICT and internet conduct
- ensuring there is adequate provision for e-Safety and appropriate internet use in the computing curriculum
- liaising with appropriate governing bodies
- keeps log of incidents using the school MIS (SIMS) to inform future e-Safety developments
- meeting regularly with e-Safety Governor to complete the Governors e-Safety Checklist, discuss current issues and review incident logs
- attending relevant meetings and training

IT Manager / ICT Services:

IT Manager and the ICT Services Department are responsible for ensuring:

- that the school's ICT infrastructure is secure and is not open to misuse or malicious attack
- that the network infrastructure meets the needs of the school and provides all users with the ability to follow the procedures outlined within these policies
- that users may only access the school's networks through a properly enforced password protection policy, in which passwords are regularly changed
- the school's filtering of internet content to individual groups is appropriate and in line with government policy and the Internet Service Provider Recommendations
- that they keep up to date with appropriate technical information in order to effectively carry out their e-Safety role and to inform and update others as relevant
- that the use of the network / remote access / email is regularly monitored in order that any misuse / attempted misuse can be reported to the e-Safety Coordinator and Principal for investigation / action /sanction.
- Web filter will continue to monitor web browsing for all users

Teaching and Support Staff

All members of teaching and support staff are responsible for ensuring that:

- they have an up-to-date awareness of e-Safety and internet conduct matters and of the policies outlined in this document
- they have read, understood and signed the school Staff Acceptable Use Policy/Agreement (AUP)
- they report any suspected e-Safety incident, misuse or inappropriate internet conduct to the E-Safety Coordinator and IT Manager for investigation /action /sanction
- digital communications with students and staff via email or via any other method should be on a professional level and only carried out using official school systems and are in line with the school Code of Conduct
- e-Safety, appropriate use of ICT systems and equipment, and internet conduct issues are embedded in all aspects of the curriculum and other school activities
- they monitor the use of ICT equipment and internet activity in lessons, extracurricular and extended school activities
- students understand and follow the aspects of the policies outlined in this document that are relevant to them
- students have a good understanding of research skills and the need to avoid plagiarism and uphold copyright regulations
- they are aware of e-Safety issues related to the use of mobile phones, cameras and hand-held devices and that they monitor their use and implement current school policies with regard to these devices
- in lessons where internet use is pre-planned students should be guided to sites that have been checked as suitable for their use and should any inappropriate content be discovered as a result of an internet search this is reported to the e-Safety Coordinator and IT Manager

Designated Safeguarding Lead

The Designated Safeguarding Lead and Deputies should be trained in e-Safety and internet conduct/cyber-bullying issues and be aware of the potential for serious child protection issues to arise from:

- sharing of personal data
- access to illegal / inappropriate materials
- on-line contact with adults /strangers
- potential or actual incidents of grooming and child exploitation including online sexual and financial exploitation
- cyber-bullying

Students:

Students are responsible for:

- using the school ICT systems in accordance with the Students Acceptable Use Policy, which they will be expected to sign before being given access to school systems.

- understanding and following the aspects of the policies outlined in this document that are relevant to them
- having a good understanding of research skills and the need to avoid plagiarism and uphold copyright regulations
- reporting abuse, misuse or access to inappropriate materials and know how to do so
- understanding and following the procedures outlined in the school policies on the use of mobile devices, digital cameras and hand held devices. They should also know and understand school policies on the taking / use of images and on cyber-bullying.
- should understand the importance of adopting good e-Safety practice and internet conduct when using digital technologies out of school and realise that the school's e-Safety, ICT Acceptable Use and Internet Code of Conduct Policy covers their actions out of school, if related to their membership of the school

Parents and Carers

Parents and Carers play a crucial role in ensuring that their children understand the need to use the internet and mobile devices in an appropriate way. Research shows that many parents and carers do not fully understand the issues and are less experienced in the use of modern technology than their children. The school will therefore take every opportunity to help parents understand these issues through Parent Information Evenings, newsletters, letters, the school website and information about national/local e-Safety campaigns. Parents and carers will be responsible for:

- endorsing (by signature) the Student Acceptable Use Policy
- providing adequate support to allow their child to operate within the procedures outlined in these policies
- supporting the school by providing any relevant information regarding their child's online activity/access in the event of an incident
- monitoring their child's use of the internet and online activity using mobile devices at home
- giving specific permission for their child to participate in the live streaming of lessons

Supply Staff

Supply staff will be requested to read and sign the Staff Acceptable Use Policy. They will be expected to follow the procedures outlined in these policies that are appropriate to their role in the school.

2. TECHNOLOGY

ICT in the 21st Century has an all-encompassing role within the lives of students and adults. New technologies are enhancing communication and the sharing of information. Current and emerging technologies used at Colchester County High

School for Girls and, more importantly in many cases, used outside of Colchester County High School for Girls by students (and staff) include but are not limited to:

- the Internet
- e-mail and Webmail *e.g. Hotmail or Gmail*
- instant messaging often using simple web cams *e.g. Facebook Messenger, Skype, Whatsapp*
- Online/distanced learning platforms like Microsoft Teams
- blogs / vlogs (an on-line interactive diary) *e.g. Bloggers*
- podcasting (radio/audio broadcasts downloaded to computer or MP3/4 player);
- social networking sites *e.g. Facebook, Twitter, Instagram, Tumblr*
- video broadcasting and streaming sites *e.g. Youtube, iPlayer, Netflix*
- chat rooms *e.g. Snapchat, Kids-online, Penguinchat, Habbo-Hotel*
- gaming sites *e.g. Mini-clip, Addicting games*
- music and book download sites *e.g. iTunes, Amazon, Google Play, Napstar*
- mobile phones with, Bluetooth, messaging, camera and video functionality;
- smart watches with Bluetooth and messaging functionality

- messaging or bluetooth communications between systems and mobile devices;
- smart phones with e-mail, web functionality and cut down 'Office' applications;
- mobile devices that access the Internet both inside and outside of Colchester County High School for Girls premises;
- remote access to Colchester County High School for Girls network (incl via BYOD)
- school provided systems such as Office 365

3. MISUSE

The Internet, email, any other online messaging systems and related technologies must not be used for knowingly viewing, transmitting, retrieving, downloading or storing any communication that is:

- Discriminatory, harassing or derogatory to any individual or group
- Obscene or pornographic, or deemed to be obscene or pornographic
- Defamatory, threatening or seen as cyber-bullying
- Illegal or contrary to Colchester County High School for Girls' policy or interests
- Subject to Copyright such as music, software or films
- Likely to cause network congestion or significantly hamper access for other users
- Any of the above, specifically using mobile devices or similar technologies to store or upload any such materials to the public domain (social-media sites) or to other devices.

Except in cases in which explicit authorisation has been granted by Colchester County High School for Girls Senior Leadership Team, users are prohibited from engaging in, or attempting to engage in:

- Monitoring or intercepting the files or electronic communications of other users
- Using other user's log-ins or passwords
- Sending or checking emails during lesson time, including email conversations with colleagues that could be deemed of a personal nature
- Breaching, testing, or monitoring computer or network security measures
- E-mail or other electronic communication that attempts to hide the identity of the sender or represent the sender as someone else
- Hacking, Blue-jacking or accessing systems or accounts that they are not authorised to use
- Obtaining electronic access to other companies' or individuals' materials. (Copyright means users cannot copy, retrieve, modify or forward copyrighted materials except as permitted by the copyright owner).

The Law and Colchester County High School for Girls Policy prohibit the theft or abuse of computing resources and includes:

- Unauthorised entry
- Using, transferring and tampering with other people's accounts and files
- Interfering with other people's work or computing facilities
- Sending, storing or printing offensive or obscene material including content that may be interpreted as sexual or racial harassment
- Mass mailing of messages
- Internet use for personal or commercial purposes
- Using the internet facilities or equipment to deliberately propagate any virus, worm, Trojan horse or any such other programme that is harmful to normal computer operations
- Accessing or uploading to any obscene, pornographic or any site of a sexual nature. Sexually explicit material may not be viewed, archived, stored, distributed, edited, emailed or recorded using the School's networks or computing resources.

If a user finds themselves connected accidentally to a site that contains sexually explicit or offensive material, they must disconnect from that site immediately. Such unintentional access to inappropriate internet sites must be reported immediately to the e-Safety Coordinator, Senior Leadership Team, IT Manager or Principal. Any failure to report such access may result in disciplinary action as per the school Code of Conduct.

It is impossible to define all possible unauthorised use, however, disciplinary action may be taken where a user's actions warrants it. Other actions deemed unacceptable, although not exhaustive, include:

- Users shall not visit Internet sites, make, post, download, upload, data transfer, communicate or pass on, material, remarks, proposals or comments that contain or relate to:
 - child sexual abuse images
 - promotion or conduct of illegal acts, e.g. under the child protection, obscenity, computer misuse and fraud legislation
 - adult material that potentially breaches the Obscene Publications Act in the UK or could be deemed as inappropriate in a school setting
 - promotion of any kind of discrimination
 - promotion of racial, religious or political hatred
 - promotion of terrorist activity, whether current or historical
 - threatening behaviour, including promotion of physical violence or mental harm
 - any other information which may be offensive to colleagues or breaches the integrity of the ethos of the school or brings the school into disrepute
- Running a private business during school hours or with school equipment
- Use systems, applications, websites or other mechanisms that bypass the filtering or other safeguards employed by the school
- Uploading, downloading or transmitting to the school system any commercial software or copyrighted materials belonging to third parties, without the necessary licensing permissions
- Revealing or publicising online confidential or proprietary information relating to the school (e.g. financial / personal information, databases, computer/network access codes and passwords)
- Carrying out sustained or instantaneous high volume network traffic (downloading / uploading files) that causes network congestion and hinders others in their use of the internet
- Accessing pornographic material or material deemed inappropriate to a school setting during school hours or using school equipment Using personal devices to record students or their work for purposes not deemed educational or outside the remit of the classroom and without permission from the Senior Leadership Team
- forward any form of chain email
- Using school messaging systems especially email to conduct personal communication not deemed school business or for educational purposes or
- Gambling online during school hours or using school equipment and noneducational online gaming during directed time
- Posting with location based social-media platforms during school hours or whilst on the school premises i.e. checking in with Facebook or similar sites
- Using file sharing systems during school hours or with school equipment
- Using online accounts during school hours for personal (non-educational) reasons, this includes but is not limited to email, social-media platforms, online banking, blogging, live-casting
- Using e-commerce to shop online during school hours including app and media purchases

- Streaming non-educational video or audio content during directed work/learning hours
- Theft or copying of files without permission
- Sending or posting Colchester County High School for Girls or local authority's confidential files outside of the organisation or inside the organisation to unauthorised staff, students, or other users
- Refusing to co-operate with reasonable security investigation.

4. EMAIL, MESSAGING & SOCIAL NETWORKING

Those that use Colchester County High School for Girls e-mail, messaging or other digital communication services are expected to do so responsibly, comply with all applicable laws, policies and procedures of Colchester County High School for Girls, and with normal standards of professional and personal courtesy and conduct. See Appendix 2 for an illustration of good practice.

The school follows sound professional practices to secure e-mail records, messaging systems, data and system programmes under its control. As with standard paper based mail systems, confidentiality of these cannot be 100% assured. Consequently users should consider the risks when transmitting highly confidential or sensitive information and use the appropriate level of security measure.

In order to effectively manage these systems the following should be adhered to:

- Open messages/mailboxes must not be left unattended
- Mailboxes should never be displayed on data-projector
- Inboxes should be kept organised with old messages deleted and important messages that require preserving saved to appropriate folders
- Care should be taken about the content of a message as it has the same standing as a letter. Report immediately to ICT support when a virus is suspected in a message.

Users must not:

- Ignore messages. These systems are designed for concise communication. If the message requires a reply, a response should be sent promptly but not during lessons, as per the school Code of Conduct
- Use anonymous messaging services to conceal identity when mailing through the Internet (with the exception of the use of Whisper); falsify e-mails to make them appear to originate from someone else, or provide false information to any Internet service which requests name, e-mail address or other details
- Abuse others, either in joke (banter) or in response to abuse directed at them or use inappropriate language or images in communication with others
- Use these technologies, either internally or on the Internet, to harass (sexually or otherwise) fellow employees, or harass or threaten anyone in any manner.

The transmission of user names, passwords, chain mail or other information related to the security of Colchester County High School for Girls' computers is not permitted.

5. USE AT HOME

Students, staff or other users accessing the Internet from home whilst using a Colchester County High School for Girls owned computer or mobile device or through school connections such as the BYOD or Remote Desktop Connection (Remote Desktop) must adhere to the policies set out in this document and adhere to the school Code of Conduct.

Family members or other 'non-Colchester County High School for Girls' users must not be allowed to access the schools computer system or use the school's computer facilities, without the formal agreement of the Senior Leadership Team.

6. PERSONAL USE

The Internet, e-mail, messaging systems and other related technologies are business tools provided to users at significant cost. Hence, it is expected that this resource will be used for professional/educational related purposes. Reasonable access and use of these systems is also available to recognised representatives of professional associations i.e. Union Officers.

These systems may be used for incidental personal purposes, with the approval of the Senior Leadership Team / e-Safety Coordinator, provided that it does not:

- Contravene the statements laid out in the Misuse section
- Interfere with Colchester County High School for Girls' operation of computing facilities or e-mail services
- Interfere with the user's employment or other obligations to Colchester County High School for Girls
- Interfere with the performance of professional duties, including the delivery of lessons and preparation of learning materials
- Is of a limited duration and frequency
- Is performed in non-work time
- Does not over burden the system or create any additional expense to Colchester County High School for Girls.

Such use must not be for:

- Any action which does not safeguard students at Colchester County High School for Girls
- Unlawful activities

- Commercial purposes not under the auspices of Colchester County High School for Girls
- Personal financial gain
- Personal use inconsistent with other Colchester County High School for Girls policies or guidelines.

All such use should be done in a manner that does not negatively affect the use of Colchester County High School for Girls' systems for professional / educational purposes. Users are expected to demonstrate a sense of responsibility and not abuse this privilege.

7. PRIVACY

Colchester County High School for Girls respects users' privacy, e-mail content will not be routinely inspected or monitored, nor content disclosed without the originator's consent. However, under the following circumstances such action may be required:

- When required by law
- If there is a substantiated reason to believe that a breach of the law or Colchester County High School for Girls' e-Safety policy/Code of Conduct has taken place
- If there is a substantiated reason to believe that a breach of Safeguarding has taken place
- When there are emergency or compelling circumstances

Colchester County High School for Girls reserves the right, at its discretion, to review any user's electronic files and messages to the extent necessary to ensure electronic media and services are being used in compliance with the law, this policy and other Colchester County High School for Girls policies.

Users should not have any expectation of privacy to his or her internet usage. Colchester County High School for Girls reserves the right to inspect any and all files stored in computers or on the network in order to assure compliance with this policy. Auditors must be given the right of access to any document, information or explanation that they require.

The use of students, staff or other users designated personal file area⁴ on the network server provides some level of privacy in that it is not readily accessible by other users. These file areas will however be monitored to ensure adherence to Colchester County High School for Girls' policies and to the law. The user's personal file area (N: Drive / OneDrive for business) is disk space on the central server / on cloud storage and is allocated to that particular user.

⁴ Before storing confidential information in this way, users are advised to ensure that they understand how to save information to their personal file area.

Managers will not routinely have access to a user's personal file area. However, usage statistics / management information on usage size of drives or a report outlining the amount of information held on an individual's personal file area will be made available from time to time or on request.

8. POLICY VIOLATIONS

Staff, students or other users who abuse the privilege of Colchester County High School for Girls facilitated access to the Internet, e-mail, messaging systems or other related technologies face being subjected to disciplinary action, up to and including termination of employment (staff) or exclusion (students), and risk having these privilege removed for themselves and possibly other employees / peers.

It is hoped that all members of the school community will be responsible users of ICT, who understand and follow this policy. However, there may be times when infringements of the policy could take place, through careless or irresponsible or, very rarely, through deliberate misuse. Listed below are the actions that will be taken against misuse.

If any apparent or actual misuse appears to involve illegal activity i.e.

- child sexual abuse images
- adult material which is inappropriate for a school setting or potentially breaches the Obscene Publications Act
- criminally racist material
- other criminal conduct, activity or materials.

The flow chart (Appendix 9) should be consulted and actions followed in line with the flow chart, in particular the sections on reporting the incident to the police and the preservation of evidence.

If members of staff suspect that misuse might have taken place, but that the misuse is not illegal, it is essential that correct procedures are used to investigate, preserve evidence and protect those carrying out the investigation.

It is more likely that the school will need to deal with incidents that involve inappropriate rather than illegal misuse. It is important that any incidents are dealt with as soon as possible in a proportionate manner, and that members of the school community are aware that incidents have been dealt with. It is intended that incidents of misuse will be dealt with through normal behaviour / disciplinary procedures.

Incidents of student misuse will be addressed using the school Student Behaviour, Sanctions and Rewards Policy and procedures and reported to the parents, e-Safety Coordinator, Senior Leadership Team and when necessary the Principal and e-Safety Governor.

Incidents of Staff / Volunteer misuse will be addressed using the Staff Disciplinary Procedures and reported to line manager, Senior Leadership Team, Executive Principal and when necessary the e-Safety Governor and Governing Body.

9. RESPONDING TO INCIDENTS OF MISUSE

An e-Safety incident should be acted upon promptly to allow the situation to be investigated and necessary personnel, that is likely to include parents and possibly the police to be informed in a timely fashion.

All e-Safety incidents are recorded in SIMS as a specific e-Safety behaviour incident.

Any incidents where students do not follow the Acceptable Use Policy will be dealt with following the school's normal behaviour or disciplinary procedures / the guidance outlined in the AUP or as detailed below.

In situations where a member of staff is made aware of a serious e-Safety incident, concerning students or staff, they will inform the e-Safety Coordinator, their line manager or Principal who will then respond in the most appropriate manner.

Instances of cyberbullying will be taken very seriously by the school and dealt with using the schools anti-bullying procedures. School recognises that staff as well as students may be victims and will take appropriate action in either situation, including instigating restorative practices to support the victim.

Incidents which create a risk to the security of the school network, or create an information security risk, will be referred to the school's e-Safety Coordinator and IT Manager and appropriate advice sought and action taken to minimise the risk and prevent further instances occurring, including reviewing any policies, procedures or guidance. If the action breaches school policy then appropriate sanctions will be applied. The school will decide if parents need to be informed if there is a risk that student data has been lost.

School reserves the right to monitor equipment on their premises and to search any technology equipment, including personal equipment such as BYOD devices, with permission, when a breach of this policy is suspected.

If an incident occurs which raises concerns about Child Protection or the discovery of indecent images on the computer, then the procedures outlined in the school's Safeguarding Policy will be followed.

The following should be used as guidance on taking action and applying sanctions following an e-Safety incident;

Student Sanctions:

Incident/Misuse	Refer to class teacher/form tutor	Refer to Pastoral Leader	Refer to Senior Leadership DSL	Refer to the Principal	Refer to police	Refer to IT Manager / IT Helpdesk	Inform parents/carers	Removal of internet access rights	Warning	Detention	Further consequence e.g. exclusion
Deliberately accessing or trying to access material that could be considered illegal		x	x	x	x	x	x	x	x	x	x
Unauthorised use of noneducational sites during lessons	x	x				x	x	x	x	x	
Unauthorised use of mobile phone/digital camera/other handheld device	x	x					x		x	x	
Unauthorised use of social networking/ instant messaging/personal email	x	x				x	x	x	x	x	
Unauthorised downloading or uploading of files	x	x				x	x	x	x	x	
Allowing others to access school network by sharing username and passwords	x	x				x	x	x	x	x	
Attempting to access or accessing the school network, using another student's account	x	x				x	x	x	x	x	
Attempting to access or accessing the school network, using the account of a member of staff		x	x			x	x	x	x	x	
Corrupting or destroying the data of other users		x	x			x	x	x	x	x	
Sending an email, text or instant message that is regarded as offensive, harassment or of a bullying nature	x	x	x	x	x	x	x	x	x	x	x

Actions which could bring the school into disrepute or breach the integrity of the ethos of the school		x	x	x		x	x	x	x	x	x
Using proxy sites or other means to subvert the school's filtering system		x	x	x		x	x	x	x	x	
Accidentally accessing offensive or pornographic material and failing to report the incident	x	x			x	x	x		x		
Deliberately accessing or trying to access offensive or pornographic material	x	x	x		x	x	x	x	x	x	
Receipt or transmission of material that infringes the copyright of another person or infringes the Data Protection Act		x	x			x	x		x		

Staff Sanctions

Incident/misuse	Refer to Line manager	Refer to Designated Safeguarding Lead (DSL)	Refer to Local authority HR and LADO	Refer to the Police	Refer to IT Manager / IT Helpdesk	Warning	Suspension	Disciplinary action

10. COMPLAINTS

Colchester County High School for Girls will take all reasonable precautions to ensure e-Safety. However, owing to the international scale and linked nature of Internet content, the availability of mobile technologies and speed of change, it is not possible to guarantee that unsuitable material will never appear on a Colchester County High School for Girls computer or mobile device. Neither Colchester County High School for Girls nor the Local Authority can accept liability for material accessed, or any consequences of Internet access.

Students and staff have access to information about infringements in use and possible sanctions.

Sanctions available include:

- Interview or counselling by Form Tutor/Year Leader /e-Safety Coordinator/ Senior Leadership Team
- Informing parents or carers of students
- Removal of Internet or computer access for a period, which could ultimately prevent access to files held on the system, including staff files or student examination coursework
- Referral to Local Authority and / or Police.

The e-Safety Coordinator acts as first point of contact for any complaint. However, any complaint about staff must also be referred to either of the Associate Principals.

Complaints of Cyber-bullying are dealt with in accordance with the Anti-Bullying Policy. Complaints related to child protection are dealt with in accordance with the Safeguarding Policy and reference to SET Procedures.

APPENDICES Appendix 1 – Data Protection Act 2018

The General Data Protection Regulation prohibits the disclosure of personal data except in accordance with the principles of the Act. This prohibition applies to Email in the same way as to other media. Information gathered on the basis that it would be seen by specified employees must not be given to a wider audience. In accordance with the provisions of Article 8 of the European Convention on Human Rights⁵, the School respects the right to privacy for employees who use IT equipment but does not offer any guarantee of privacy to employees using IT equipment for private purposes.

As data controller, Colchester County High School for Girls has responsibility for any data processed or stored on any of its equipment. Any employee monitoring will be carried out in accordance with the principles contained in the Code of Practice issued by the Information Commissioner under the provisions of the Data Protection Act 2018.

In order to comply with its duties under the Human Rights Act 1998, Colchester County High School for Girls is required to show that it has acted proportionately, i.e. are not going beyond what is necessary to deal with the abuse and that the need to investigate outweighs the individual's rights to privacy, taking into account the schools wider business interests. In drawing up and operating this policy the School recognises that the need for any monitoring must be reasonable and proportionate.

Auditors (internal or external) are able to monitor the use of Colchester County High School for Girls IT equipment and the storage of data. They are nevertheless bound by the provisions of the Human Rights Act 1998, the Data Protection Act 1998, associated codes of practice and other statutory provisions and guidance, including the Regulation of Investigatory Powers Act 2000 in respect of any activity that could be classed as directed surveillance⁶. (See Appendix 2)

⁵ Everyone has the right to respect for his private and family life, his home and his correspondence.

⁶ 'Directed Surveillance' is defined as surveillance which is covert (i.e. carried out in a manner calculated to ensure that the persons subject to the surveillance are unaware that it is or may be taking place) but not intrusive, for the purpose of a specific investigation in such a manner as is likely to result in the obtaining of private information about a person.

Appendix 2 - Email and Messaging – Good Practice Guide

	Good Practice
Read Receipt	When it is important to know that a recipient has opened a message, it is recommended that the sender invoke the 'read receipt' option.
Attachment Formats	When attaching a file it will have a specific format. Be aware of the possibility that a recipient may not have the software necessary to read the attachment. Format incompatibility can occur even between successive versions of the same software, e.g. different version of Microsoft Word.
Email Address Groups	If messages are regularly sent to the same group of people, the addressing process can be speeded up by the creation of a personal group in the personal address book.
Message header, or subject	Convey as much information as possible within the size limitation. This will help those who get a lot of Emails to decide which are most important, or to spot one they are waiting for.
Subject	Avoid sending messages dealing with more than one subject. These are difficult to give a meaningful subject heading to, difficult for the recipient to forward on to others for action, and difficult to archive.
Recipients	Beware of sending messages to too many recipients at once. When sending messages for more than one-person's use be sure to indicate people for whom there is some expectation of action or who have central interest; cc to indicate those who have peripheral interest and who are not expected to take action or respond unless they wish to do so.
Replying	When replying to a message sent to more than one person, do not routinely reply to all recipients of the original message. Consider who needs to read your reply, e.g. if the sender is organising a meeting and asking you for availability dates, you need only reply to the sender.
Absent	If you have your own Email address, it is possible, for users of MS Exchange or have local enhancements to MS-mail, to set the 'out of office' message when you are going to be away for some time, e.g. on annual leave. You will not lose your messages, they will await your return, but the sender will know that you are not there and can take alternative action if necessary.

	Good Practice
Evidential Record	Never forget that electronic conversations can produce an evidential record which is absent in a telephone conversation. Comments made by an employee during the course of an exchange of Emails could be used in support, or in defence, of the Academy's legal position in the event of a dispute.
Legal records	Computer generated information can now be used in evidence in the courts. Conversations conducted over the Email can result in legally binding contracts being put into place.
Distribution Lists	Keep personal distribution lists up-to-date and ensure you remove individuals from lists that no longer apply to them.
Email threads	Include the previous message when making a reply. This is called a thread. Threads are a series of responses to an original message. It is best that a response to a message is continued by using reply accessed on the quick menu bar, rather than start an entirely new message for a response. Keep the thread information together. It is easier for the participants to follow the chain of information already exchanged. If the message gets too long the previous parts can be edited while still leaving the essence of the message.
Context	Email in the right context, care should be taken to use Email where appropriate. There may be occasions when a telephone call would be more appropriate especially on delicate matters. Beware of the use of excessive use of capitals. It can be interpreted as SHOUTING so consider how the style of your email may be interpreted by its recipient.
Forwarding Emails	Consideration should be given when forwarding Emails that it may contain information that you should consult with the originator before passing to someone else.
Large Emails	For larger Emails, particularly Internet Emails, where possible send at the end of the day as they may cause queues to form and slow other people's Email.

Appendix 3 - Legislative Framework - The Human Rights Act 1998

This provides for the concept of privacy, giving a 'right to respect for private and family life, home and correspondence'. The provision is directly enforceable against public sector employers, and all courts must now interpret existing legislation in relation to the Human Rights Act. *Halford v UK* 1997 suggests that employees have a reasonable expectation of privacy in the workplace, and employers are recommended to provide workers with some means of making personal communications which are not subject to monitoring, for instance a staff telephone line or a system of sending private Emails which will not be monitored.

Covert monitoring is likely to be unlawful unless undertaken for specific reasons as set out in the Regulation of Investigatory Powers Act 2000 and the Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000 (see below). Employers should make sure workers know of any monitoring or recording of correspondence (which includes Emails, use of Internet, telephone calls and faxes etc.).

Appendix 4 - Regulation of Investigatory Powers Act 2000

This Act covers the extent to which organisations can monitor or record communications at the point at which they enter or are being sent within the employer's telecommunications system, and applies to public and private communication networks. It gives the sender or recipient of a communication the right of action for damages against the employer for the unlawful interception of communications.

There are two areas where monitoring is not unlawful. These are:

- where the employer reasonably believes that the sender and intended recipient have consented to the interception
- without consent, the employer may monitor in the following circumstances, as set out in the Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000. These include:
 - to ensure compliance with regulatory practices
 - to ensure standards of service are maintained, e.g. in call centres
 - to prevent or detect crime
 - to protect the communications system this includes unauthorised use and potential viruses
 - to determine the relevance of the communication to the employer's business i.e. picking up relevant messages when someone is away from work.

However, the employer is expected to make all reasonable efforts to ensure system users know that communications may be intercepted, and any such monitoring must also comply with the provisions of the Data Protection Act 1998 (see below), and in particular the Data Protection principles on fair processing.

Appendix 5 – The General Data Protection Regulation

The Information Commissioner - responsible for enforcement of the General Data Protection Regulation - is publishing four codes of practice to help employers comply with the provisions of the Data Protection Act. These codes clarify the Act in relation to processing of individual data, and the basis for monitoring and retention of email communications.

The code of practice '*Monitoring at work: an employer's guide*' states that any monitoring of emails should only be undertaken where:

- The advantage to the business outweighs the intrusion into the workers' affairs - Employers carry out an impact assessment of the risk they are trying to avert workers are told they are being monitored
- Information discovered through monitoring is only used for the purpose for which the monitoring was carried out
- The information discovered is kept secure
- Employers are careful when monitoring personal communications such as emails which are clearly personal
- Employers only undertake covert monitoring in the rarest circumstances where it is used for the prevention or detection of crime.

Appendix 6 – Relevant Legislation

Telecommunications (Lawful Business Practise) (Interception of communications) Regulations 2000

This Act empowered the Secretary of State to make regulations, which allow businesses to intercept communications in the course of lawful business practice and in specific circumstances without the express consent of either the sender or the recipient. Under the Regulations, businesses are required to make all reasonable efforts to inform users of their own systems that such interceptions might take place.

Contract law

It is just as possible to make a legally binding contract via Email as it is by letter or orally. Workers need to be aware of the danger of inadvertently making contracts on behalf of their employer, or varying the terms of any existing contract.

Copyright law

The Copyright, Designs and Patents Act 1988 (as amended) gives the same protection to digital and electronic publications as it does to printed books and other forms of publication. Many websites carry warnings that the information given is copyright and should not be downloaded without agreement from the copyright holder. Similarly copyright exists over software, which should not be downloaded without license.

Obscene Publications Act 1959, Protection of Children Act 1988, Criminal Justice Act 1988

These Acts are concerned with material that might be criminal, cause harm to young persons or be otherwise unlawful. In the workplace the downloading of certain images from the Internet might subject a worker to charges of criminal behaviour.

Computer Misuse Act 1990

This Act is mainly concerned with the problems of Unauthorised Access into computer systems or 'Hacking'. The law covers:

- Unauthorised access to computer material
- Unauthorised access with intent to commit or facilitate a crime
- Unauthorised modification of computer material
- Making, supplying or obtaining anything that can be used in computer misuse offences

Appendix 7 - Lawful Business Practice Regulations (LBP)

The LBP Regulations authorise employers to monitor or record communications **without** consent for a number of purposes, including the following:

- To establish the existence of facts relevant to the business.
- To ascertain compliance with the regulatory or self-regulatory practices or procedures relevant to the business.
- To ascertain or demonstrate standards which are, or ought to be, achieved by persons using the system.
- To prevent or detect crime.
- To investigate or detect the unauthorised use of telecommunication systems.

The Regulations cover all types of communications including those that are Internet based, by fax and by email.

Appendix 8 – Governors e-Safety Checklist

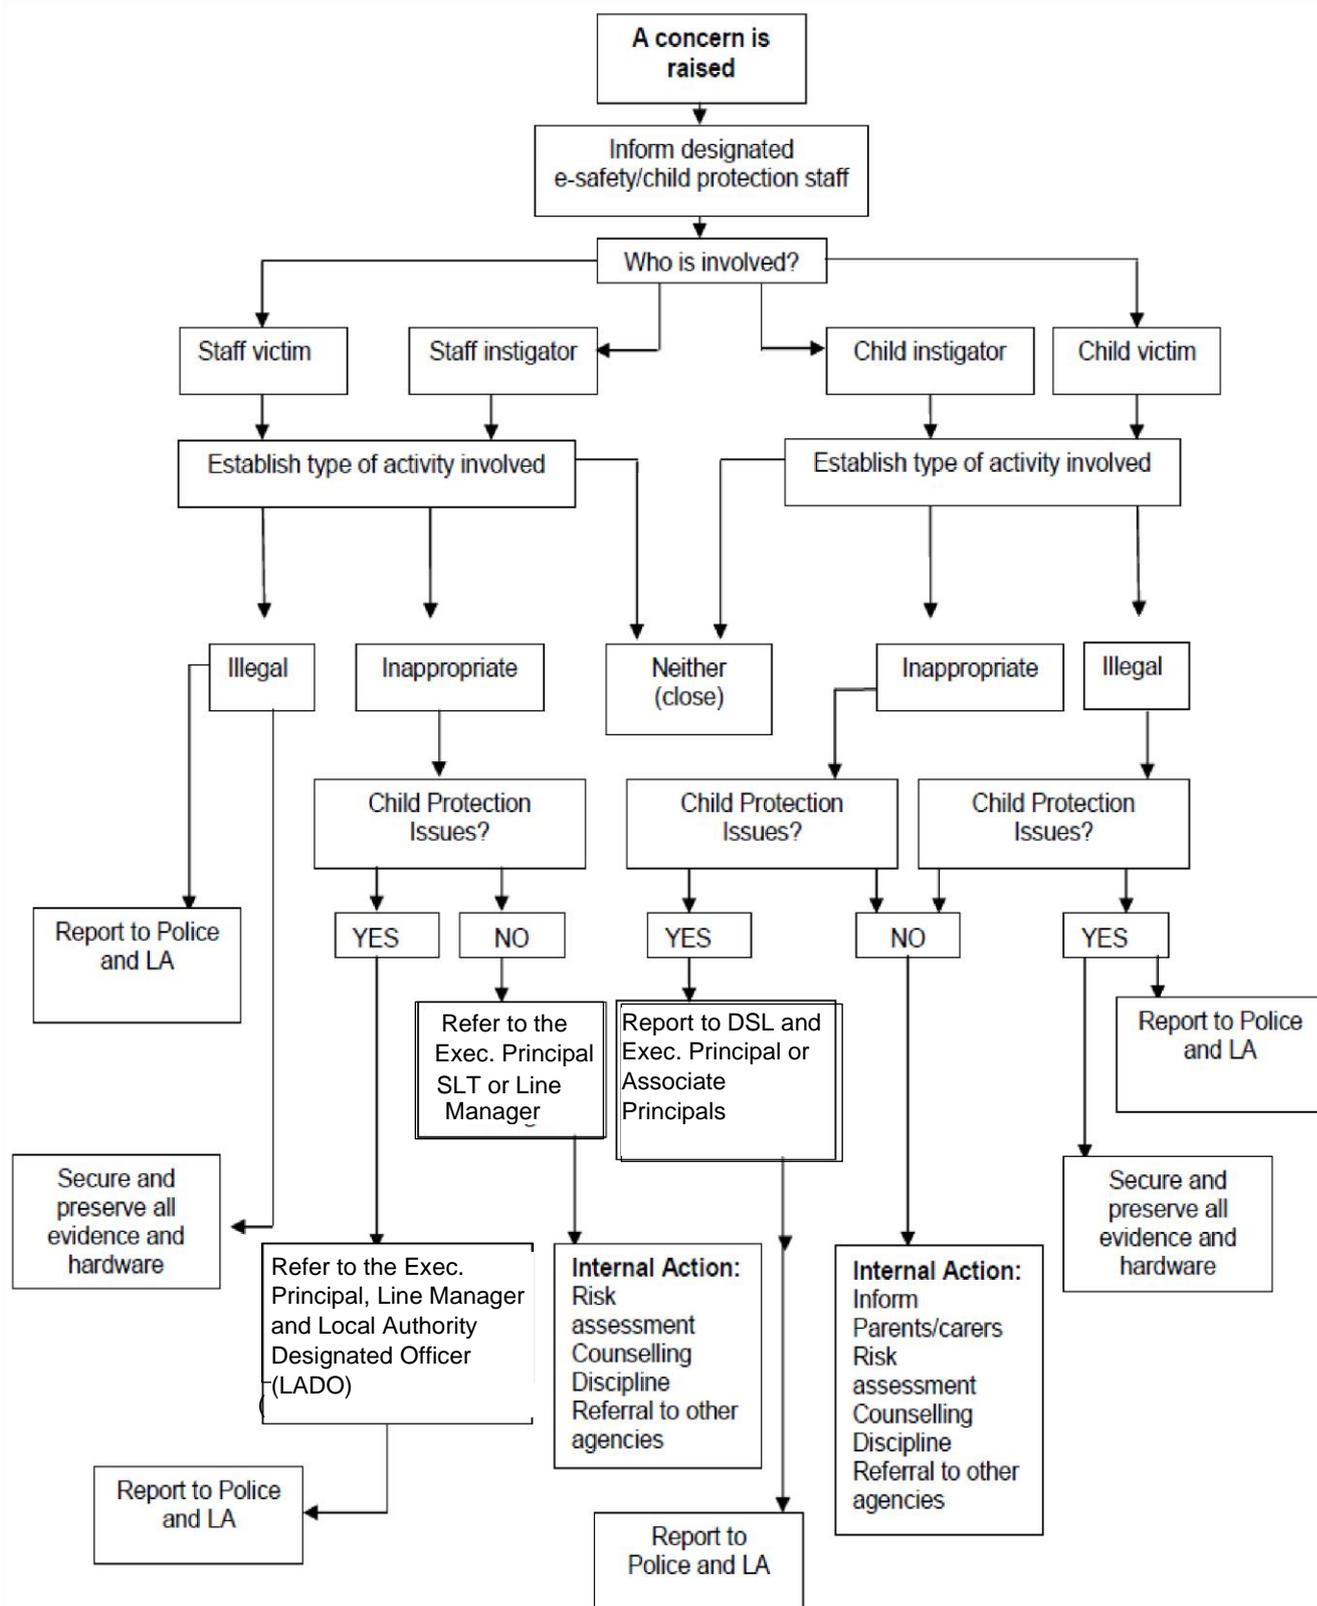

It is the responsibility of the e-safety Governor and e-safety Coordinator to ensure that this document is completed and then reviewed once a year at the annual meeting between the two personnel. The results are to be reported to the governing body annually or at the next meeting following a major incident.

Status	R	A	G	Action/Comments
Appropriate e-safety policy agreed by governors and in place.				
Appropriate Acceptable Use Policies are in place for all users – signed and stored centrally.				
All staff (teaching and non-teaching) and any volunteers or supply staff are familiar with the current E-Safety policy and the Acceptable Use Policy.				
Staff have received appropriate training for e-safety, misuse of ICT and inappropriate internet conduct.				
E-safety, misuse of ICT and inappropriate internet conduct forms part of the induction process for new staff.				
All parents/carers have received a copy of the school’s Acceptable Use Policy.				
Appropriate procedures are in place to deal with any e-safety, misuse of ICT and inappropriate internet conduct incidents that should occur.				
Status	R	A	G	Action/Comments
All staff (teaching and non-teaching) and any volunteers or supply staff are informed of how to raise a concern and can gain access to the ‘A concern is raised’ flow diagram.				
A central record of e-safety incidents is being recorded – this has been viewed showing the most recent incidents.				
Appropriate filtering is applied to internet content available through the schools network.

Appendix 9 – Flowchart for Responding to a Serious e-Safety Incident

(Based on Staffordshire LA Safeguarding Board)

Appendix 10 – Staff ICT Acceptable Use Policy No 44a

Computing Facilities

The school's network of computer systems and devices is owned by the school and is made available to staff in order to support their professional work. This ICT Acceptable Use Policy has been written to protect all users – students, staff and the school community. You are responsible for professional behaviour when using the systems, all of its resources and the Internet. You are expected to be an active participant in e-Safety education, taking personal responsibility for your own and your students' awareness of the opportunities and risks posed by new technologies.

This policy applies to using school resources both on-site and off-site. You agree and accept that any computer/laptop or other ICT device loaned to you by the school is provided solely to support your professional responsibilities and that you will notify the school of "any significant personal use" as defined by HM Revenue and Customs, and seek permission for such use from either Associate Principal.

Staff should refer to the full e-Safety Policy (No44) or e-Safety Coordinator for further clarification or details. It is the responsibility of employees to read the latest version of the policy because technology and the law change regularly.

Staff can access the school's internal systems from outside school by using the school provided devices (Laptops / Cloud books / Tablets) that have been enabled for use with Direct Access. These devices will work the same outside of the school as if on site with the only requirement being an internet connection.

If not using a school owned device then email can be access via the website or via: <https://mail.cchsg.com/owa>

To access files that have been migrated to the cloud, these can be accessed through SharePoint, of which the link for this resources is found on the school website.

Logging on and Security

- You are responsible for the protection of your own network logon accounts and should not divulge passwords to anyone else.
- Always be wary about revealing your home address, telephone number, or school name on the Internet. Personal details of any adult working at the school or student at the school should not be given. (see e-Safety Policy)
- Other computer users should be respected and should not be harassed, harmed, offended or insulted. (See e-Safety policy)
- Always log off when leaving a workstation, even for a short time.
- To protect yourself and the systems, you should respect the security settings on the computers; attempting to bypass or alter the settings may put you or your work at risk. (See e-Safety policy)
- Computer storage areas are accessible by ICT Services IT Helpdesk staff who may review your files, communications and computer usage to ensure that you are using the system responsibly. (See e-Safety policy)

Use of the Network and Computer Facilities

All users must take responsibility for their own use of new technologies, making sure they use the technology safely, responsibly and legally. It is unacceptable to knowingly:

- Install any unauthorised software. Always get permission from the Network Administrator before installing, attempting to install or store programs of any type on the computers.
- Damage, disable, or otherwise harm the operation of computers, or intentionally waste resources. This puts yours and others work at risk.
- Introduce a malicious code or virus. If using removable media such as USB memory sticks do not open any files that you suspect may have been infected with a virus or malicious program. The network anti-virus programme should notify you before infected files are opened.
- Try and gain access to an unauthorised area or system.
- Use any form of hacking or cracking software / system.
- Access, download, create, store or transmit material which is indecent or obscene, or material which could cause annoyance, offence, anxiety or distress to other network users, or material which infringes copyright, or material which is unlawful.
- Use any applications or services to bring the school or its members into disrepute.

The network and computers are provided for professional and educational purposes. You may use the computers for private use in your own time providing that use does not prevent others from using resources for work purposes. (see e-Safety Policy for restrictions)

You have a duty to report failings in technical safeguards which may become apparent when using systems and services.

You should protect the computers from spillages by eating or drinking well away from the ICT equipment.

Use of the Internet

Filtering software is used on the school network to prevent access to inappropriate internet sites, and to protect the computer systems. Staff should be aware that the school logs all Internet use.

Access to the Internet is provided for school activities. You may access the Internet for reasonable appropriate private use in your own time providing that use does not prevent others from using resources for work purposes. (See e-Safety policy for restrictions)

Connection to the schools wireless network is permitted only for professional/educational purposes only. Connection with personal devices such as

tablets or smartphones permitted only at the discretion of the e-Safety Coordinator, Senior Leadership Team and Network Administrator.

Only access appropriate material; using the Internet to obtain, download, send, print, display or otherwise transmit or gain access to materials which are unlawful, obscene, abusive or likely to cause anxiety or distress is not permitted. (See e-Safety Policy for definitions)

You should respect the work and ownership rights of people outside the school, as well as other staff or students. This includes abiding by copyright laws. (See e-Safety Policy Appendix 6 for details.)

Use of Email

All users should understand that network activity and online communications are monitored, including any personal and private communications made via the school network. Automated software scans all email, and removes anything which could affect the security of the computer systems, or contain unsuitable or offensive content.

Only the school email account should be used for emails which are sent on school business. You should not use a personal email account for school business. Remember that any emails sent using a school email account are sent on behalf of the school in the same way as official letters. Emails should be professional in language and tone and should not compromise the reputation of the school.

Your school email account should not be used routinely to communicate with family and close friends. Personal email accounts should be used for personal communication and also to sign up for mailing lists or online communities that are not school related.

Only open attachments to emails if they come from someone you already know and trust. Attachments can contain viruses or other programs that could destroy all the files and software on your computer.

If you receive an email containing material of a violent, dangerous, racist, or inappropriate content, or which is bullying in nature, you should always report such messages to a member of ICT support staff and your line manager.

Emails should not be used during lessons unless it is deemed an emergency. Emails should not be used to communicate with colleagues on aspects that could be deemed of a personal or casual nature.

The sending of an email or text containing content likely to be unsuitable for students or schools is strictly forbidden.

You should regularly delete unwanted sent and received e-mails.

Social Media

The use of social media can enhance teaching and learning but is also used widely for social interaction. With this in mind, teachers should exercise extreme caution when using social media sites such as Facebook and ensure maximum privacy settings. (See e-Safety Policy for further guidance and clarification)

Under no circumstances should a teacher use a personal social media account in the classroom or to facilitate their lessons. It is unacceptable for a member of staff to accept a friend request from an existing student on a personal social media account. See 44c Social Media Policy for further guidance.

Use of Online/Distanced Learning programmes – Teams

When using an online learning platform like Microsoft Teams, staff at CCHSG should ensure that:

- Every Team should have 2 staff members to safeguard everyone in the Team, the additional person should ideally be a Head of Department or Year Leader
- Staff should ensure that students participating in a live stream has permission from their parents to be there. No permission - No live stream
- Staff and students should establish and follow clear ground rules of that particular Team (e.g. no speaking over each other, offering rude or silly comments, using it as a private messaging service, sharing personal details). This is likened to a teacher creating the correct climate for learning in their classroom. If live streaming, these rules need to be reiterated every session
- Students should not record, re-produce or re-distribute materials from the live stream, including taking screen shots. They will be removed from the Team immediately if found doing so and reported to the e-Safety Coordinator.
- All members of the Team participate in live streaming in neutral area, (ie, not in a bedroom or bathroom). Microsoft Teams has the capability to blur or neutralise a background should the user wish.
- Members of the Team should not disclose personal information to anyone in the stream; such as their location, date of birth or phone number to anyone on the livestream, these should always be kept private. School-allocated email addresses are the only email addresses to be used. Usernames and passwords must never be shared.
- Team members do not have to be visible –audio participation or via live chat only are also acceptable.
- All members of the Team are dressed appropriately (i.e. follows the schools normal non-uniform day dress code)
- Teams should not be used on a one to one basis between staff and students. Remote learning on a one to one basis is not appropriate.

Personal Laptops / Computers / Devices

Personal laptops / computers / hand-held devices are only allowed to be used in school with permission of the Principal. Connection to the school network however must be agreed with the e-Safety Coordinator, Senior Leadership Team, Principal and IT Manager.

Disciplinary Procedures

If you breach these provisions, access to the network may be denied and you may be subject to disciplinary action. Additional action may be taken by the school in line with existing policy regarding staff Code of Conduct and Disciplinary Procedures. Where appropriate, police may be involved or other legal action taken. (See e-Safety Policy for details).

ICT Services Helpdesk

Any problems or faulty equipment should be reported to the ICT Services IT Helpdesk immediately. You should not attempt to repair equipment yourself.

Mobile Device Encryption

To comply with the Data Protection Act 2018, all school owned mobile devices that could be used off site will be encrypted enabling us to ensure that all data will be kept secure if the device is lost or stolen. (A mobile device can be described as any portable device which can hold data on the local drive which would be accessible by other means if this device was lost or stolen.)

Encryption will be managed by ICT Services. No user other than a person in ICT Services may decrypt the drive on a temporary or permanent basis. Failing to adhere to this will make you liable for any data access breaches which could incur fines.

Remote Data Wipe

CCHSG staff who have access to school email through their mobile phones must accept that ICT Services will have the right to remote wipe the device to prevent any data access breaches if the device is lost or stolen. Failure to notify ICT Services in the event of a device being lost or stolen will render you personally liable for any fines incurred.

Privacy and Personal Protection

- CCHSG staff must at all times respect the privacy of other students and members of staff; this includes not taking photographs or video or sound recordings.
- Staff should not forward messages (private or otherwise) without permission from the original sender.
- Staff should not supply personal information about themselves or others, on any type of websites or within email.

- When using social media staff must keep all information about school private; especially naming the school which you work at.
- Staff must not upload any pictures or videos taken in school or that show school uniform to any social media sites including Facebook, YouTube, Instagram, WhatsApp or Snapchat

Please read this document carefully. Only once it has been signed and returned will access to the school computer network be permitted.

I have read and understand the above and agree to uphold the standards outlined within these guidelines and the e-Safety Policy.

Appendix 11 – Student ICT Acceptable Use Policy No. 44b

Computing Facilities

Students are encouraged to make use of the school computing facilities for educational purposes. All students are expected to be active participants in e-safety education, taking personal responsibility for their awareness of the opportunities and risks posed by new technologies.

Due to high demand for computer facilities at lunchtimes, use of computers at this time must be restricted to school work only. **Students must not be in ICT rooms after school unless supervised by a member of staff.**

Students can access the school's email by either visiting the school website or by going to <https://mail.cchsg.com/owa>. To access any resources, students must go to the school website and access these through SharePoint.

Logging On and Security

- Students are responsible for the protection of their own network logon accounts and must not divulge passwords to anyone.
- Students must not log on as someone else, nor use a computer which has been logged on by someone else. Students should also log off when leaving a workstation, even for a short time.
- Any attempts to access, corrupt or destroy others users data, or compromise the privacy of others in anyway, using any technology is unacceptable.
- Computer storage areas are accessible by ICT staff who may review your files, communications and computer usage to ensure that you are using the system responsibly.

(See e-Safety Coordinator or e-Safety Policy if further clarification is required)

Use of the Network and Computer Facilities

All users must take responsibility for their own use of new technologies, including BYOD devices, making sure they use the technology safely, responsibly and legally. It is not acceptable to knowingly:

- Access, download, create, store or transmit material which is indecent or obscene, or material which could cause annoyance, offence, distress or anxiety to any other student or member of the school community, or is bullying or harassing in nature, or material which infringes copyright, or material which is unlawful. This will result in action being taken, according to the School Behaviour Policy.
- Download or install programs to a school owned computer or a BYOD.
- Introduce a virus, or malicious code.
- Bypass network and systems security, breach technical safeguards or conceal network identities.
- Access another student's account.
- Gain access to an unauthorized area or system.

- Use any form of hacking or cracking software / system.
- Use any applications or services to bring the school or its members into disrepute.
- Engage in activities which damage resources, waste teaching or technical support time or use the network resources in such a way so as to diminish the service for other network users.

(See e-Safety Coordinator or e-Safety Policy if further clarification is required)

Students have a responsibility to report any known misuses of technology including the unacceptable behaviour of others.

Students have a duty to report failings in technical safeguards which may become apparent when using systems and services.

Students must not eat or drink in a designated computer room or near any computer equipment, including a BYOD.

Use of the Internet

Filtering software is used on the school network to prevent access to inappropriate internet sites, and to protect the computer systems. Students should be aware that the school logs all Internet use.

- The use of public chat rooms is not allowed.
- The use of social networking and video websites is not allowed unless used for educational purposes and approved by the class teacher and/or e-Safety Coordinator
- Students should not copy (plagiarise) and use material from the Internet to gain unfair advantage in their studies, for example in coursework. Such actions may lead to disqualification by examination boards.
- Students should ensure that they are not breaking copyright restrictions when copying and using material from the internet.
- Students must not reveal their own or another student's personal information such as name, address, telephone number, email address or school name over the internet.

(See e-Safety Policy if further clarification is required)

Use of Email

All users should understand that network activity and online communications are monitored, including any personal and private communications made via the school network.

- Student email accounts are primarily for communication between students and teachers in relation to school work.
- Students are not allowed to use email during lessons without the teacher's permission.
- If a student receives an e-mail from an unknown person, or which is offensive or upsetting, the relevant teacher or a member of the ICT technical staff

should be contacted. Do not delete the email in question until the matter has been investigated.

- The sending / forwarding of chain e-mails are not allowed.
- The sending of a large number of multiple e-mails is acceptable only for good reason. Before doing so, the student must obtain permission from the e-learning coordinator or Network Manager.
- Students must not open attachments from senders they do not recognise, or that look suspicious.
- Students should periodically delete unwanted sent and received e-mails.
- Students may only use the e-mail accounts set up by the School. The use of e-mail facilities such as Hotmail and MSN instant messaging must only be used with permission from the e-learning coordinator or Network Manager.
- Students should not use their school email address for signing up to any online accounts, or share their email address with persons/organisations not associated with the school without permission from the e-learning coordinator or the IT Manager.

(See e-Safety Coordinator or e-Safety Policy if further clarification is required)

Use of Online/Distanced Learning programmes – Teams

When using an online learning platform such as Microsoft Teams, students at CCHSG should ensure that;

- Every Team should have 2 members of staff
- Students should ensure that they have permission from their parents to participate in live streaming of lessons at CCHSG. Their parents should have signed the Live streaming consent declaration. No permission - No live stream
- Students should follow the clear ground rules any particular Team (e.g. no speaking over each other, offering rude or silly comments, using it as a private messaging service, sharing personal details).
- Students should not record, re-produce or re-distribute materials from the live stream, including taking screen shots. They will be removed from the Team immediately if found doing so and sanctioned using the school's Behaviour, Rewards and Sanctions Policy
- All members of the Team who participate in live streaming do so in a neutral area, (ie, not in a bedroom or bathroom). Microsoft Teams has the capability to blur or neutralise a background should the user wish.
- Members of the Team should not disclose personal information to anyone in the stream; such as their location, date of birth or phone number to anyone on the livestream, these should always be kept private. School-allocated email addresses are the only email addresses to be used. Usernames and passwords should never be shared.
- Team members do not have to be visible –audio participation only is also acceptable.

- All members of the Team are dressed appropriately (i.e. follows the schools normal non-uniform day dress code)
- Teams should not be used on a one to one basis between staff and students. Remote learning on a one to one basis is not appropriate.
- If students are concerned or suspicious about any activity on Teams, they should report it to their Year Leader.

Personal Laptops / Computers

Non BYOD devices for example personal laptops / computers and hand-held devices are only allowed in school with written permission from the Year Leader who will specify the times when they can be used. Connection to the schools network is only granted with permission from IT Manager following discussion with the Senior Leadership Team.

Use of Other Technology

Technology such as media rich phones, Personal Digital Assistants (PDA), tablets (including iPads), e-readers, memory cards, USB Storage devices and anything else that can be used to store, transmit or manipulate data should be used responsibly, and in accordance with the e-Safety Policy and used only during the times specified to students. Mobile phones should be turned off at all times during the school day, including at break and lunch times, in accordance with School Behaviour, Rewards and Sanctions Policy. Year 12 and 13 students are allowed to use their mobile phone in the Sixth Form Common Room area only.

Privacy and Personal Protection

- Students must at all times respect the privacy of other students and members of staff; this includes not taking photographs, video or sound recordings.
- Students should not forward private messages without permission from the original sender.
- Students should not supply personal information about themselves or others, on any type of websites or within email.
- People you contact on the internet are not always who they seem, therefore, students must not attempt to arrange meetings with anyone met via a website or email.
- When using social media students must keep all information about school private; especially naming which school is attended.
- Students must not upload any pictures or videos taken in school or that show school uniform to any social media sites including Facebook, YouTube, Instagram, WhatsApp or Snapchat
- Students should realise that the school has a right to access personal folders on the Network and/or confiscate personal technologies such as mobile phones. Privacy will be respected unless unacceptable use is suspected.

Disciplinary Procedures

Violation of this ICT Acceptable Use Policy may result in a temporary or permanent ban on network use. Additional disciplinary action may be taken in line with the School Behaviour, Sanctions and Rewards Policy. Where appropriate, police may be involved or other legal action taken. (See e-Safety Policy for further details)

ICT Services

Any problems or faulty equipment should be reported to a teacher or ICT technician immediately. Students should not attempt to repair equipment themselves.

Please read this document carefully. Only once it has been signed and returned will access to the school computer network be permitted.

I have read and understand the above and agree to uphold the standards outlined within these guidelines and the e-Safety Policy.

Appendix 12 – Social Media Policy No. 44c

INTRODUCTION AND CONTEXT

This policy governs the publication of and commentary on social media by associates of Colchester County High School for Girls. This extends to employees, governors, students, parents and any other personnel associated with the school. For the purposes of this policy, social media means any facility for online publication and commentary, including without limitation, blogs (including blogs on platforms like Instagram), wiki's, social networking sites such as Facebook, LinkedIn, Twitter, Flickr, and YouTube. This policy is in addition to and complements any existing or future policies regarding the use of technology, computers, e-mail and the internet. These are outlined below in the policy links.

Colchester County High School for Girls associates are free to publish or comment via social media in accordance with this policy. Colchester County High School for Girls associates are subject to this policy to the extent they identify themselves as having association with Colchester County High School for Girls.

Social Media refers to a multitude of media facilities that allow users to interact socially. They offer many different types of computer-mediated tools that allow people or companies to create, share, or exchange information, career interests, ideas, and pictures/videos in virtual communities and networks.

Social Media has developed into a powerful tool for education, but it is also a platform that is open to potential abuse. The purpose for this policy is to clarify expectations of associates of Colchester County High School for Girls and to offer help and advice on the use of Social Media both professionally and personally.

Publication and commentary on Social Media carries similar obligations to any other kind of publication or commentary.

All uses of social media must follow the same ethical standards that Colchester County High School for Girls associates must otherwise follow.

ICT Communications Procedures and Guidance for Staff (in Staff Handbook)

Please Note: This e-Safety Policy has been written by Colchester County High School for Girls e-Safety Coordinator. It has been agreed by Colchester County High School for Girls Governing Body, Senior Leadership Team, ICT Network Support and the e-Safety Coordinator.

PROFESSIONAL USE OF SOCIAL MEDIA AS AN EDUCATIONAL TOOL

Colchester County High School for Girls actively encourages the use of appropriate Social Media platforms for educational benefit inside and outside the classroom environment. Although departments are actively encouraged to have a Social Media presence these expectations must be met:

- When making the decision to create a departmental account/page/group/channel or any other Social Media facility that associates with Colchester County High School for Girls or a department within, notification must be provided to the Senior Leadership Team and the e-Safety Coordinator.
- Following notification a request for approval may be issued. In such cases any activity on the social media platform in question must be withheld until approval is granted.
- The terms of service must be followed on all platforms of Social Media.
- Social Media presence from a particular individual or a department must clearly identify its association with Colchester County High School for Girls. For example a Facebook page created by the PE department might be called "Colchester County High School for Girls PE Department" or the Twitter handle used by computing teacher "@MrNachmanCCHSGIT" but the account named "*Colchester County High School for Girls Computing Department*".
- It is appropriate to allow multiple personnel who belong to a department to make posts however, posts must only be made from the departmental account or other professional only account and in no way from an employee's personal or private account.
- It is an expectation that employees (this extends to those in temporary employment or employment by association such as trainee teachers) will do all that they can to disassociate personal or private social media accounts with those created for educational purposes. This will only increase the risk of potential invasion of privacy. For example, a member of staff should not post from their personal Facebook account onto the Facebook page that has been created for the department in which they work. If they wish to make posts on the page they should seek permission to do so from the HoD and be granted permission to do so as a page administrator or create a professional account that clearly identifies them and associates them with the school and department and that is used solely for professional/educational use then use this account to make posts on the departmental page. Employees should not

like or follow the professional pages/accounts of the school, employees or the departments thereof from their personal accounts.

- It is wholly acceptable for all other associates (not employees) including, students, governors and parents to create social media interactions (such as likes, comments, favourites, retweets etc.) from their own personal pages provided these interactions are appropriate. Appropriate social media interactions outlined below.
- For the purpose of this explanation all social media interactions will be referred to as posts. All associates of Colchester County High School for Girls must only make posts on any social media platform pages/accounts of the school, employees or the departments thereof that are appropriate. This means that no words/images/videos/links or any other type of digital media that are deliberately offensive, hateful, incite violence, racism, extremist views, dangerous and unlawful activities, sexual reference or nudity, any activity that does not safeguard the students and employees of Colchester County High School for Girls, that expose private personal details of others, that degrade the school or any other organisation.
- Departmental or individual professional pages should create a link (such as a follow or friend) with the school official account when possible on the same platform. This serves as authentication of the account and as moderation/supervision of content posted. It is expected that the school official account will share/retweet/favourite/repost/like/comment on as significant posts made from the department account.
- Posts made should serve the purpose of improving the communication and promoting the school and individual department. Posts should have significance to the activities in the department or subject area and/or be educationally beneficial.
- If any associate is in doubt about making a particular post in regards to its content or intentions then caution should be exercised. Seek advice from the HoD or from the e-Safety coordinator before posting or choose another more appropriate method of communication for said information.

Advice and tutorials on how to set up departmental Social media Accounts can be sought from the e-Safety Coordinator and ICT support.

PERSONAL USE OF SOCIAL MEDIA Advice for employees

- Generally employees of Colchester County High School for Girls should exercise caution when online and use Social Media responsibly. General advice for staying safe online and responsible use of Social Media can be found in appendix 1.
- The terms of service must be followed on all platforms of Social Media.
- Personal use of Social Media accounts by employees is acceptable but not essential for those using Social Media professionally. A personal Social Media presence should be as separate from their professional accounts as possible

much in the same way that you separate your real world personal life from your professional life.

- An employee's personal Social Media interactions should uphold the high standard of professional, social, moral, spiritual, cultural and ethical behaviour that is expected of secondary school employees.
- Posts should always be appropriate as outlined in the previous section of this policy.
- An employee should take all actions to disassociate their personal Social Media accounts with those of the school or school departments.

It is acceptable for an employee to identify them as an employee of Colchester County High School for Girls where applicable on Social Media platforms but all other references to school activity should be minimised.

A member of staff's personal Social Media accounts and subsequent posts should use the highest level of privacy settings that only allow views/interactions from those that have been accepted as a friend/follower.

- Privacy settings should be regularly reviewed and adjusted so as maintain the highest levels of privacy. In addition, a regular review of friend and follow lists should take place.
- It is not appropriate for an employee to accept a friend/follow request from students on roll in the school. It is advisable that staff exercise professional judgement and caution in accepting requests from students who are no longer on roll but may still have links with other students in school.
- Employees should exercise professional judgement in accepting requests from close family members of existing students.
- Employees should not make posts/interactions that have direct reference to school activities/policy from personal accounts. Any such interaction should be carried out solely from professional accounts. For example, it would be inappropriate for an employee to post comments and images about activities taken place in a particular lesson from their personal Social Media account but it would be completely appropriate to do so from their professional/departmental account.
- It would be considered inappropriate and unprofessional for a member of staff to make any posts that portray negativity or degradation towards the school, school activities or towards other employees or associates of Colchester County High School.

Advice for other associates (including students)

- Generally, associates of Colchester County High School for Girls should exercise caution when online and use Social Media responsibly. General advice for staying safe online and responsible use of Social Media can be found in appendix 1.
- The terms of service must be followed on all platforms of Social Media.

- Students in particular, and their parents, are strongly advised to adhere to age restrictions in place on certain Social Media platforms
- It is acceptable for associates of Colchester County High School for Girls to follow/friend/subscribe to pages/accounts/groups created by the school, departments or as professional accounts by employees.
- It is unacceptable for students to request/friend/follow/subscribe the personal accounts of employees of Colchester County High School. Other associates should exercise caution in sending a request so as to avoid compromising the employee's professional integrity.
Posts and all interactions to school official Social Media or employee's professional accounts must be appropriate as outlined in the previous section of this policy.
- Staff, students and the wider community are not permitted to create posts including images/video footage/any other media that have been captured on the school premises or that show a student or group of students wearing school uniform. Such posts are only permitted from the school official Social Media accounts or staff/ department professional accounts.

USING SOCIAL MEDIA DURING SCHOOL HOURS

- The only acceptable use of Social Media during school hours and/or using the school facilities is for the purposes of education. It is unacceptable for staff, students or any associates of Colchester County High School for Girls to access personal Social Media accounts for any non-school related activities either in lesson time or any other time during the school day.
- The above condition applies in-particular to accessing personal Social Media accounts through mobile devices connected either through CCHSG Wi-Fi or personal mobile data provider.

Social Media in Lessons

- It is appropriate to use Social Media during lessons provided the platform is suitable for the context of the lesson. Teaching staff however should note that in planning to use Social Media in a lesson that some platforms will not be accessible through the school proxy server. We follow the guidance and levels of filtering provided by our local council ISP and are therefore unable on request to un-filter or unblock particular social media sites.
- It must be accepted by employees that; if a particular platform is blocked by the proxy server for students then it is not suitable for use by students in school, if a particular platform is blocked by the proxy server for employees then it is not suitable for use in school at all.
- If a lesson is being delivered and is making use of students being able to access their personal accounts for the purpose of the lesson the teacher should exercise caution to make sure that the activity is being carried out as planned and the Social Media interactions carried out by the students are appropriate for the purpose of the lesson.

- In some cases it may be appropriate to use school owned mobile devices and the use of an appropriate Social Media software App to facilitate the lesson. This is appropriate but agreement must be made beforehand with ICT services to have the appropriate App pre-installed and connection to Wi-Fi available. Teaching staff must also take particular care to log out of their account on the particular device they are using and to remind students to do so also. Personal devices must not be used without permission from the Senior Leadership Team.

At present it is not acceptable to allow students to use personal mobile devices to connect to CCHSG Wi-Fi and is therefore not appropriate to allow student to use personal mobile devices to access social media for the purposes of a lesson even through the use of a personal mobile data provider.

- In special circumstances, such as an educational visit where students have been granted permission to carry their own mobile devices, students may use Social Media from their personal devices so long as the intention is to enhance the learning experience. They are not permitted to create posts including images/video footage/any other media that have been captured to show a student or group of students wearing school uniform. Such posts are only permitted from the school official Social Media accounts or staff/department professional accounts.

POLICY VIOLATIONS AND RESPONDING TO MISUSE

Policy violations and the response to these will be treated as an e-Safety policy violation and use the same procedures will be followed.

If you have made a mistake and unintentionally caused a policy violation or another problem then the best policy is to be honest and act quickly. Social Media can be powerful tool both in the promotion and defamation of an individual so a fast and honest response to a mistake is the best procedure to minimise the impact. Discuss the problem immediately with your line manager and report to SLT and/or the e-Safety coordinator.

If the mistake relates to a particular post/social media interaction then a physical record should be taken such as a screenshot or even just a photograph. Then the post or interaction should be removed/undone as quickly as possible. If unsure on the best course of action then consult the e-Safety Coordinator or ICT services with the support of your line manager.

Appendix 13 – General Advice for Online Safety and Responsible Use of Social Media

With all online activity the general rules that we educate our associates to follow and promote are:

- Keep all personal information secret (do not post online anywhere) especially real names (and the names of friends and family), address and postcode, email address and the school you attend.
- Take particular care of the passwords you use for all user accounts – use a secure password (for further guidance see video link below), never ever share these with anyone especially doing so online, do not write passwords down, do not allow other users to access or use any of your accounts.
<https://www.commoncraft.com/video/secure-passwords>
- Regularly review privacy settings on your social media accounts, it should only ever be acceptable for people who you have accepted as friends to be able to access your profile and see the posts you make. You must choose settings that do not allow your profile or posts to be available publically or to users that you have not accepted friend requests from; failure to do so puts you and others at risk.
- Friend/follower requests should only be accepted on the basis that they are family members or existing friends that you know and can trust. It is highly risky to make online friends without knowing who they really are; this puts the user and all of their friends at risk.
- Never meet up with anyone with whom you have only had online contact with, you can never really trust someone to really be who they say they are. If you do think you can trust an online friend and want to meet in person, this must be a carefully considered decision discussed with your parents; the only way that is ever acceptable is to meet in a busy place with parents present for supervision.
- Take particular care if receiving emails/messages from people you do not know or messages from existing contacts that look unusual or out of the ordinary in any way. Suspicious messages are often Phishing attempts which could cause the security of your computer system to be compromised by becoming infected with a computer virus or spyware. Do not follow any web links within a message unless you are completely sure what the link is and that it is safe.
- Always be wary when someone tries to make contact with you online. Try to establish if you do actually know the person and they are really who they say they are – use a few questions or make some comments that only your friends would genuinely understand and know the answers to. Remember it can be easy for someone to see your online friends or those of your friends, pick a name and then create an account in that name and pretend to be that person.
- It is vitally important that you report any suspicious online behaviour or any thing that makes you feel uncomfortable. You can tell your parents or another

adult you trust, a teacher at school, report it directly to CEOP or the local police, or even just share it with a friend who can help. Even if you don't experience something directly or do not feel threatened it is still your duty to report inappropriate online behaviour to the appropriate personnel. Your actions may prevent the suffering of someone else.

We strongly advise parents to discuss the use of these and other platforms that your children might be using.

It is only acceptable for your children to use these Social Media if you have first of all given them permission to do so. This should be an informed decision that pays respect to the age restrictions and general terms of use.

Find out what the platform allows users to actually do and in particular how your children use it. There is joint responsibility between the parent and child to use social media responsibly and parents should be proactive in monitoring their child's online activity much in the same way that you monitor other real-world social interactions. This can be carried out as a bonding exercise between you and your child; you can agree to allow them to use the platform so long as they periodically talk you through their activity and teach you how to also use the platform. If this is done from an early age and frequently enough it can be normalised and be as simple as discussing "what did you learn at school today?" or "who did you spend lunchtime with?"

A simple rule you can observe when deciding to allow your child to use a social media platform is that they can do so as long as they also help you create your own account, show you how to use it and accept you as a friend. This will allow you to monitor your child's activity without being too intrusive or time consuming.

Depending on the age of your child you may also want to discuss having full access to your child's account or applying the use of parental controls. There should be clear boundaries that both parent and child observe.

Most social media platforms have parental control features or at least a help and advice section aimed at helping parents improve the safety of the platform. A simple internet search of the terms "parental controls..." and the name of the platform will return the results and advice you are looking for.

These website listed below are particularly useful in helping parents find out more about online safety and key facts about the social media platforms young people are using.

Advice for Staff for Online/Distanced Teaching and Learning

There are the occasions where Teaching and Learning needs to be delivered online. This is a guide for staff to deliver lessons online, whilst still maintaining high standards in learning, whilst keeping eSafety to a premium. Live streaming is a valuable way to connect with the wider community, but staff must be aware of students' online safety.

Planning and setting work:

- All lessons/work should follow the Schemes of Work agreed by the Head of Department and be in line with what would be normally taught in a classroom where possible.
- A note of the work planned should be made in the staff planner as per normal Teaching and Learning expectations
- Instructions should be explicit, limiting any doubt by the student. Instructions can be built into a presentation or as a separate document.
- All work should be uploaded onto the CCHSG SharePoint and a separate school email should be sent to Students alerting them to the upload. Staff may also upload onto Teams should they wish, but this is in addition to SharePoint, not instead of. Staff should be mindful of the time work is uploaded; this should be completed within the confines of the working day (i.e. up to 18.00) and not late into the evening.
- All communication about work should be via school email in the first instance.
- Staff should be mindful of the length of time tasks may take and plan accordingly. This main mean that something which would normally take one lesson in normal circumstances may take two.
- Staff should plan for a consolidation lesson at least once fortnightly to embed and consolidate the learning completed at home.
- If staff are setting work which requires an element of on-line research, safeguarding advice should be issued to students.
- All links or clips should be quality assured before posting in a learning resources.
- Staff must take the usual care when producing learning materials, taking into account the difficulties individual students may have if a topic is personally difficult for them or may trigger a response which would need one to one support from a member of staff. It is important to note that students may be more vulnerable at this time due to the direct impact of Covid-19 on themselves and their families.

Delivering work via Teams:

Staff can deliver their planned work via Teams if they so wish. This is an online platform that allows teachers to either simply upload work to the platform and respond in writing to students during or after the lesson via a specific Team; or pre-record content, to record over PowerPoint presentations, as well as the capacity to 'Live Stream'.

Every organisation that provides Live Streaming activities for students should gain consent from parents or carers for their child to participate. It is also important to gather the necessary information to keep children safe during the activity.

When setting up your Teams, it is the responsibility of the member of staff to ensure the correct security settings are in place, with Staff having clear ownership of the Team, not the students. Staff should be fully aware of the functionality of the system and how to use it before embarking on activities. Staff also have the option to limit the activities students can do; e.g. to limit the chat function, limit the use of emoji type symbols or stickers. Staff should clearly articulate to students the rules of the Team and that they can remove students from a Team should they break any of the 'rules'.

The basic rules everyone at CCHSG should follow are:

- Every Team should have 2 staff members to safeguard everyone in the Team, the additional person should be a Head of Department or Year Leader
- Staff should ensure that students participating in a Live stream has permission from their parents to be there. No permission, no Live stream
- Staff and students should establish and follow clear ground rules of that particular Team (e.g. no speaking over each other, offering rude or silly comments, using it as a private messaging service, sharing personal details). This is likened to a teacher creating the correct climate for learning in their classroom. If live streaming, these rules need to be reiterated every session
- Students should not record, re-produce or re-distribute materials from the live stream, including taking screen shots. They will be removed from the Team immediately if found doing so and sanctioned in line with the school's Behaviour, Rewards and Sanctions Policy.
- All members of the Team participate in live streaming in neutral area, (ie, not in a bedroom or bathroom), or with the background blurred.
- Members of the Team should not disclose personal information to anyone in the stream; such as their location, date of birth or phone number to anyone on the livestream, these should always be kept private. School-allocated email addresses are the only email addresses to be used. Usernames and passwords should never be shared.
- All members of the Team are dressed appropriately (i.e. follows the schools normal non-uniform day dress code)
- Teams should not be used on a one to one basis between staff and students. Remote learning on a one to one basis is not appropriate

Marking work via Teams:

Staff should clearly articulate to students which piece of work will be specifically marked and in what way. Staff may choose to do this using the Assignment section of Teams. Any work set in this way should be marked, either online or by other means, and follow the marking guidelines set out in the whole school marking policy. This includes frequency of marking and quality of the formative comments made. There is the ability to set up quick tests and quizzes in Teams. Staff should follow their departmental guidelines when marking these types of activities and make a record of all marks in their mark books.
